SCIF AS A SERVICESM | ENVISION THE FUTURE AND MAKE IT HAPPEN

WHO WE ARE

Westway Enterprises, is a highly successful secure commercial services company.

For the past 14 years Westway has distinguished itself by providing a unique infrastructure approach, which enables innovation by changing the way Federal government agencies and the private sector connect and collaborate in secure environments at all levels of classification.

Through continual process and infrastructure improvements, Westway maintains its position as the national leader in secure facility design, capability, flexibility and scalability. Let Westway support your mission.

WHY WESTWAY?

GROUNDING BY A SENSE OF PATRIOTISM AND PURPOSE

National security is our WHY, SCIFs are our WHAT, and The Westway Model is our HOW.

RELATIONSHIP COMPANY

Reputation of putting the needs of clients, tenants, and national security first, even before the bottom line. Highly experienced team with extensive relationships and credibility across government and intelligence communities.

LEADING THE MARKET WITH A TIME-PROVEN SERVICE MODEL

Transformational, adaptive service model that has been tested over the last 14 years with proven performance. Others have tried but failed.

ALREADY "RUNNING", NOT STANDING FLAT ON OUR FEET

Uniquely positioned to quickly adapt and scale to meet increasing needs of the national security community.

WHAT WE ADDRESS

Rapidly proliferating foreign and domestic physical, cyber, and other asymmetric threats endanger national security. Mitigation efforts are often undermined by speed of action and untapped potential for innovative partnerships among the Department of Defense (DoD), Intelligence Community (IC), Department of Homeland Security (DHS), government contractors, and small businesses.

Westway sees this as a critically important national call to action for bold, imaginative approaches to secure facility design, capability, scalability, flexibility, cost, and location. Underpinning the Westway approach is a deeply experienced team, ensuring strict adherence to applicable standards.
